THE REGULAR MEETING OF THE BOARD OF DIRECTORS
OF STOCKTON EAST WATER DISTRICT WAS HELD AT THE DISTRICT OFFICE
6767 EAST MAIN STREET, STOCKTON, CA
ON TUESDAY, AUGUST 24, 2021 AT 12:30 P.M.

A. PLEDGE OF ALLEGIANCE AND ROLL CALL

President Watkins called the regular meeting to order at 12:30 p.m. and Director McGaughey led the Pledge of Allegiance.

Present at roll call at the District were Directors Atkins, Cortopassi, McGaughey, McGurk, Panizza, Sanguinetti and Watkins. Also present were Manager Moody, Assistant Manager Hopkins, Finance Director Vega, Administrative Services Manager Carido, Administrative Clerk Feliciano, Legal Counsel Zolezzi and Consultant Barkett.

B. CONSENT CALENDAR (None)

C. PUBLIC COMMENT (None)

D. SCHEDULED PRESENTATIONS AND AGENDA ITEMS

1. Minutes 08/17/21 Regular Meeting

A motion was moved and seconded to approve the August 17, 2021 Regular Board Meeting Minutes, as presented.

Roll Call:

Ayes: Atkins, Cortopassi, McGaughey, McGurk, Panizza, Sanguinetti, Watkins
Nays: None
Abstain: None
Absent: None

2. Warrants – California Public Employees’ Retirement System

A motion was moved and seconded to approve the August 24, 2021 Warrants – California Public Employees’ Retirement System, as presented.

Roll Call:

Ayes: Atkins, Cortopassi, McGaughey, McGurk, Panizza, Sanguinetti, Watkins
Nays: None
Abstain: None
Absent: None

3. Stockton Area Water Suppliers (SAWS) Education Program Annual Report – 2020/2021 School Year (Presentation by Water Conservation Coordinator Kristin Coon)

Water Conservation Coordinator Coon presented the SAWS Education Program Annual Report for the 2020/2021 School Year to the Board. Water Conservation Coordinator Coon provided a handout of the Annual Report and gave an overview; Report Summary, Full Report, Feedback and Report Stats. Water Conservation Coordinator Coon reported due to COVID-19, all Stockton area schools were closed March 13, 2020 and remained closed the entire 2020/2021 school year. Water Conservation Coordinator Coon explained the SAWS Water Education Program developed a virtual education program via Padlet, offering the SAWS Virtual Education Program with materials for teachers to include with their

curriculum. Water Conservation Coordinator Coon presented the “Make A Water Cycle Bracelet” activity which teaches students about the water cycle; the materials were put together by Water Conservation Coordinator Coon and was a successful activity during virtual lessons.

Water Conservation Coordinator Coon reported the SAWS Education Program sponsored Zun Zun Virtual “Water Beat” Program assemblies for five schools in Spring 2021, which engaged students through music and instruments teaching them about water conservation; this program reached students K-6th grade. Water Conservation Coordinator Coon added the SAWS Education Program also participated in the Virtual Rotary Read-In and AgVenture programs; “Why Should I Save Water?” a book about water conservation was shared with the students during the read-in program and a presentation by Water Conservation Coordinator Coon was shown to the students of the AgVenture program followed by a live question and answer session with Water Conservation Coordinator Coon.

Water Conservation Coordinator Coon reported the outreach statistics; 4,366 students reached virtually through SAWS on-line Padlet Program, 2,383 students reached virtually through Zun Zun’s on-line assemblies, 3,750 students reached virtually through on-line AgVenture and 257 students reached in person through Lincoln Unified School District Summer School. Water Conservation Coordinator Coon reported the total students reached by all programs in the 2020-2021 School year was 10,756 which included 44 Stockton area schools and 236 classrooms.

Water Conservation Coordinator Coon presented positive feedback from the teachers that participated in the Virtual SAWS Water Education Program.

Water Conservation Coordinator Coon reported the SAWS Education Program was welcomed back by Lincoln Unified School District for their summer school program in June 2021. Water Conservation Coordinator Coon reported in May 2021 community members were allowed on campus and the year was booked quickly but due to a rise in COVID cases, community members have once again been restricted from schools; Lincoln and Stockton Unified School Districts were rescheduled to the Spring but will reassess in November 2021. Water Conservation Coordinator Coon added Lodi Unified School District gave the discretion to their school principals and the SAWS Education Program has scheduled in-person presentations this school year.

Director McGurk inquired if the water cycle bracelets were purchased. Water Conservation Coordinator Coon replied she put them together to distribute to the students.

Director Panizza stated he was impressed with Water Conservation Coordinator Coon’s alternative methods to deliver the program to the schools and keep students engaged. Water Conservation Coordinator Coon replied she has taken advantage of the Environmental Literacy Program at the San Joaquin County Office of Education which provided seminars and trainings to teach educators how to transition from in-class education to virtual education.

Director McGaughey complimented Water Conservation Coordinator Coon for doing a great job with the SAWS Virtual Education Program. Water Conservation Coordinator Coon thanked the Board for their continued support.

4. Stockton East Water District Response to San Joaquin County Superior Court – Independent Special Districts: Transparency “Not Found” Case #0220, 08/24/21

Manager Moody stated the Board was presented with the Grand Jury case at a previous Board Meeting, Legal Counsel Zolezzi drafted the response letter which requires approval by the Board. Manager Moody reported the edit to Appendix A was the mis-spelling of Director McGaughey’s first name and the response letter indicates the correction.

Director McGurk reported he had a conversation with a representative of the Grand Jury and they thanked him for responding to the case as other agencies have not.

A motion was moved and seconded to approve the Stockton East Water District Response to San Joaquin County Superior Court – Independent Special Districts: Transparency “Not Found” Case #0220, as presented.

Roll Call:

Ayes: Atkins, Cortopassi, McGaughey, McGurk, Panizza, Sanguinetti, Watkins
Nays: None
Abstain: None
Absent: None

5. Association of California Water Agencies – Ballot for Region 4 Board Election for the 2022-2023 Term

Manager Moody provided the Board with information on the Association of California Water Agencies (ACWA) – Region 4 Board Ballot for the 2022/2023 Term. Manager Moody inquired if the Board would like to vote for the Nominating Committee’s recommended slate or individual Board Candidates.

Director Panizza recommended casting the ballot for ACWA’s recommended slate for Region 4 Chair, Vice Chair and Board Members.

A motion was moved and seconded to approve the Nominating Committee’s Recommended Slate of Chair: John Mensinger; Vice Chair: Brian Sanders and Board Members: Bryan Busch, Ronald Davis, Cary Keaten, Thomas McGurk and Kristin Sicke as presented for the ACWA Region 4 Board of Directors for the 2022/2023 Term.

Roll Call:

Ayes: Atkins, Cortopassi, McGaughey, McGurk, Panizza, Sanguinetti, Watkins
Nays: None
Abstain: None
Absent: None

6. Stockton East Water District – Water Supply SCADA Project – 5 Spill Sites Memo, 08/24/21

Assistant Manager Hopkins provided the Board with a memo on the Water Supply SCADA Project – 5 Spill Sites. Assistant Manager Hopkins reported the budget for Fiscal Year 2021/2022 includes a project to install five SCADA sites on our various waterways in the New Hogan system to measure outflow from the Creeks and Slough. Assistant Manager Hopkins stated Staff looked into options for the equipment due to the close proximity to the City of Stockton and are in high vandalism areas from other facilities that we have. Assistant Manager Hopkins reported South San Joaquin Irrigation District gave Staff the recommendation for a option called a pillbox which is a hardened, subterranean enclosure that

is mounted in a block of concrete; South San Joaquin Irrigation District installed 3-4 pillboxes at problematic sites and have not reported any issues. Assistant Manager Hopkins explained the pillboxes would be used at spill sites to prevent vandalism; the pillboxes are expensive and would cost \$87,877.41 for 5 pillboxes but does include some of the electronic equipment inside.

Director McGurk inquired if the pillbox includes solar and battery charger. Assistant Manager Hopkins replied it does include the solar panel but not the antennas.

Director Panizza inquired what type of services are required for the pillboxes. Assistant Manager Hopkins replied once the pillboxes are installed the only component that needs servicing is the battery; the battery will be monitored remotely and if there is a problem then Staff can go out and service the pillbox.

Director McGurk inquired what the battery life is on the pillbox. Assistant Manager Hopkins replied they have a 3-5-year lifespan.

Manager Moody stated the project satisfies compliance with SB x7-7 but it can also be part of our SB 88 plan as an alternative plan; by measuring inflow, diversions and the amount of outflow, all other water is recharge.

Director Cortopassi commented if storm water is pumped in above McAllen Dam we should not put a weir below. Manager Moody replied Staff will look into it and if so, it will be placed above.

Director Atkins inquired if the spill box is above or below ground. Assistant Manager Hopkins replied it is both but less than half of the pillbox is above ground.

Director Sanguinetti inquired if the District has special radios. Assistant Manager Hopkins replied yes and they will connect to our existing radio network. Director Sanguinetti inquired if they will interfere with trees. Assistant Manager Hopkins replied the radio testing has been done and Staff knows how tall the antennas have to be. This item was for information only.

E. COMMITTEE REPORTS (None)

F. REPORT OF GENERAL MANAGER

1. Water Supply Report as of 08/23/21

Manager Moody provided a handout of the Water Supply Report for information only that included storage, release, and production data collected from various sources as of midnight last night.

There is 101,593 AF in storage at New Hogan Reservoir. Current releases are set at 151 cfs. Current release at Goodwin Dam to Stanislaus River are set at 369 cfs and release to all water users are set at 250 cfs. There are 8 irrigator(s) on New Hogan, 2 irrigator(s) on New Melones and 5 Out-of-District irrigator(s). The water treatment plant is currently processing 32 mgd. The City of Stockton is currently processing 23 mgd.

Director Cortopassi inquired how long the New Melones release will be at 1,409. Legal Counsel Zolezzi stated she forwarded an email to Manager Moody notifying the District that

the release would go down to 350 cfs due to reduced Delta needs; the next day the release would go up 250 cfs to accommodate the water transfer. Legal Counsel Zolezzi added Department of Water Resources would then release their required amount for fish which is ~250 cfs.

Manager Moody reported the District requests water from United States Bureau of Reclamation (USBR) beginning in January but the financial accounting year begins in October.

2. Information Items:

Manager Moody noted items: F2a-1, F2a-2 and F2a-3.

3. Report on General Manager Activities

a. ACWA State Legislative Committee Meeting, 08/20/21

Manager Moody attended the August 16, 2021 Special ACWA State Legislative Committee Meeting. Manager Moody reported there were three bills discussed which included the Safe Drinking Water and Water Quality Bill. Manager Moody commented Mr. Eggerton was evacuated and is encouraging ACWA to renew its charge for head water forest management. Manager Moody added there is a trailer bill signed by the Governor, which would give reimbursement funds to water and sewer agencies that did not receive payment from residents due to the pandemic; Federal/State governments are providing the funds. Manager Moody reported a new push to go after water rights, the Governor is being encouraged to create new legislation for modernized water rights. Manager Moody reported the executive order that amended the Brown Act expired however there is a Bill that is being introduced to make the amended executive order permanent to continue to allow virtual meetings; it will require 2/3 vote in both houses to amend the Brown Act.

Director Watkins inquired when the amended executive order expires. Legal Counsel replied it expires on October 1st 2021. Director Watkins inquired if that applies for Board of Directors and Public. Manager Moody replied we will look into it and report back to the Board.

b. Central Valley Project Water Association – Executive & Financial Affairs Committee, 08/20/21

Finance Director Vega attended the August 20, 2021 Central Valley Project Water Association – Executive & Financial Affairs Committee. Finance Director Vega reported there was a presentation given by a lobbyist trying to shape future spending to help complete CVPIA projects and more materials will be shared at future meetings. Finance Director Vega reported the CVPIA true-up efforts are getting positive feedback but have been put on hold until the new commissioner is sworn in; other business on hold includes their budgeting process -- the Bureau of Reclamation would have sent an accounting letter to the Districts by now, but that is also pending the swearing in of the new commissioner. Finance Director Vega reported Friant gave an update on their project and a brief overview of how Water Infrastructure Improvements for the Nation (WIIN) Act funding works; the misconception is that the WIIN Act would fund 50% of the project and the remaining 50% would be funded by the awarded district, however the WIIN Act funds 50% upfront but requires a benefit analysis and whichever benefits are reimbursable would then be paid by the district in addition to the 50% matching funds. The next meeting is scheduled on September 17, 2021.

c. Stockton East Water District Activities Update

Manager Moody and Assistant Manager Hopkins attended the August 20, 2021 Stockton Area Water Suppliers (SAWS) Meeting. Manager Moody reported discussion about the anticipated drought and operations for next summer; forecasting the end of irrigation season to be ~ 80,000 acre-feet at New Hogan and ~15,000 acre-feet at the dead pool. President Watkins commented the dead pool at Calaveras is at 2,000 acre-feet and 19,000 acre-feet for next year. Manager Moody reported there was an inquiry about our wells being operational should the drought affect water supply; the wells have to be taken out of stand-by for PG&E and our water permit with Department of Drinking Water which will take time so that process needs to start now.

Director McGaughey inquired about rain predictions. Manager Moody replied the prediction is that we will have a La Niña year which means a low water year in the winter; our location is usually on the line for both the north which is wetter and south which is drier.

Director McGaughey commented she is surprised the City of Stockton has not enforced rules on water usage as they have in the past. Manager Moody replied the City of Stockton has talked about it but because of their contract with the District, they will receive New Melones water as normal.

Manager Moody reported the City of Stockton is working on a project to extend a drinking water pipeline to the VA Hospital in French Camp and another project to add a large pipeline to go under the 99 Freeway to the Stockton Airport. Manager Moody added because of the critically dry year our New Hogan contract allows us to go down to a 10 cfs release which will happen after irrigation season to conserve water.

Director Cortopassi inquired if we service Western Ranch. Manager Moody replied yes, the pipeline belongs to the City of Stockton but it is our water.

G. DIRECTOR REPORTS (None)

H. COMMUNICATIONS (None)

I. AGENDA PLANNING/UPCOMING EVENTS

1. San Joaquin Farm Bureau Federation – Water Committee Meeting, 5:30 p.m., 08/24/21

J. REPORT OF THE COUNSEL

1. Closed Session: REAL PROPERTY – GOVERNMENT CODE
SECTION 54956.9 – Property: Water Rights
Agency Negotiator: Scot A. Moody
Negotiating Parties: The San Luis & Delta-Mendota Water Authority/United States Bureau of Reclamation
Under Negotiation: Water Transfer
2. Closed Session - Potential Litigation
Government Code 54956.9 (c) – two cases

3. Closed Session – Personnel
Government Code 54957

President Watkins adjourned the meeting to closed session at 1:31 p.m. to discuss closed session agenda items. District staff, with the exception to Manager Moody and Administrative Services Manager Carido, were excused from the closed session meeting at 2:10 p.m. The regular meeting reconvened at 2:29 p.m., with no reportable action.

K. ADJOURNMENT

President Watkins adjourned the meeting at 2:30 p.m.

Respectfully submitted,

Scot A. Moody
Secretary of the Board

Memorandum

To: Scot A. Moody – General Manager
From: Justin Hopkins – Assistant General Manager
Darrel Evensen – District Engineer
Gianna Cianfichi – Associate Engineer
Date: 8/31/2021
Re: Standby Power and Power Study Project

BACKGROUND

As a part of the Stockton East Water District's (District) FY21-22 budget, the Board of Directors (Board) approved funding to conduct a Water Treatment Plant (WTP) Power Study which includes both study and design elements. The project includes analyzing the WTP power quality, identifying critical electrical assets within each process, providing a 20-year electrical capital improvements list by priority, and design of standby power for the High Service and Low Lift Pumping Stations, Administration, and Operation facilities. The District requested proposals for this project on July 7th. The proposals were due on July 28th. The District only received one proposal from JSP Automation (JSP).

SUMMARY

The JSP proposal includes several tasks to fully address the requirements for the power system evaluation and report. The primary task is to evaluate the power quality, provide analyses, and recommendations. Other tasks are to evaluate the standby power processes, provide a new design for the low lift, operation, and administration building standby power, identify and analyze the critical assets within the different WTP processes (includes providing sequencing, cost, and a 20-year replacement plan), and provide a design to ensure all of the pumps at the High Service Pumping Station are on standby power (presently, only Switch Board B has standby power).

The budget for the Water Treatment Plant Power Study Project, including standby power design, is \$116,500 and the proposal received has a total cost of \$101,360.

RECOMMENDATIONS

District staff recommends proceeding with JSP Automation Power Quality and Power System Analysis Proposal for \$101,360, plus a 10% contingency, for a total approved amount of \$111,496.

Memorandum

To: Scot A. Moody – General Manager
From: Justin Hopkins – Assistant General Manager
Darrel Evensen – District Engineer
David Vilcherrez – Associate Engineer
Date: 8/31/21
Re: Cotta-Ferreira Dam Replacement Project

BACKGROUND

As part of the 2021-2022 budget, the Board authorized \$132,500 for the rehabilitation of the Cotta-Ferreira Dam, which includes design, construction, flow measurement, and control automation. The purpose of the project is to replace the dam structure and install a new flow control automated meter.

INTRODUCTION

The proposed rehabilitation project is located north of Eight Mile Road on Mosher Creek. In addition to the ability to accurately measure flow, the project will provide the ability to monitor flow remotely and make real-time flow adjustments, thus decreasing unnecessary site visits for the water supply group. A similar installation was successfully completed upstream at Mosher Creek Headworks. Figure 1 shows the Mosher Creek Headworks SlipMeter.

Figure 1: Rubicon SlipMeter at Mosher Creek

Flow Control & Automation

Flow control and automation saves limited resources and time. Benefits of flow control and automation include:

- Maintained discharge flows, continuously adjusting in real time,
- Longer unmanned periods saving man hours,
- Corrective action taken without onsite attendee,
- Follow-up adjustments made remotely reducing the amount of time on site, and
- Reduction in end of system spills.

PROPOSED PROJECT

The existing dam structure, which includes a manually operated canal gate and I-beams to support flashboards, is in a deteriorating condition and currently does not have flow measurement. The new design for the dam structure involves two wingwalls and two I-beams centered in the canal which will support the flashboards.

District staff selected the Rubicon SlipMeter as the most appropriate flow control device because all the electronic equipment is out of the water, the measurement accuracy is within the range required by the U.S. Bureau of Reclamation, and the SlipMeter adjusts autonomously to maintain a flow, gate position, or water level set point. The quoted cost for the single Rubicon SlipMeter, including installation supervision, commissioning, solar power and batteries, shipping, and tax is \$29,556.

RECOMMENDATION

Staff recommends the Board authorize the General Manager to purchase one Rubicon SlipMeter in the amount of \$29,556, plus a 10% contingency, for a total approved amount of \$32,512, which is within the project budget of \$132,500.

Subject: RE: Can I count on your support for ACWA Vice President?

Hi Cathy,

I would be happy to present your information to my Board for consideration.

Regards,

Scot Moody CSDM
General Manager
Stockton East Water District
Phone: 209-948-0333

From: Cathy Green <cgreen@ocwd.com>

To: Scot A. Moody <SMoody@sewd.net>
Subject: Can I count on your support for ACWA Vice President?

Dear Scpt:

I trust you are having an enjoyable, safe summer. I am so thankful that the ACWA “family” has remained connected through virtual regional events, committee meetings, and planning for the fall conference.

As you may have heard, I am running for ACWA Vice President. Information about my candidacy and qualifications [is available here](#).

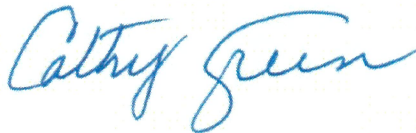

It has been such a pleasure working with ACWA members, and I am truly proud of the collaboration forged between so many water districts and cities statewide. Together, we have accomplished so much over the years, and it is my hope that we continue this great work. We have produced high-quality programs, effectively advocated on important state and federal water issues, influenced legislation and regulations, realized a high level of participation by ACWA members, and prudently managed the budget.

Serving you as ACWA Vice President would truly be an honor, and I am excited about the opportunity to help lead ACWA into the future, building on its organizational success and excellence in serving its member agencies. I have been an active member of ACWA since 2012, served on various ACWA committees, and served as Chair and Vice Chair of ACWA Region 10. As such, I have had the privilege to form positive working relationships with numerous contacts throughout California.

My work as a Board Member at the Orange County Water District since 2010 has also allowed me to work in partnership with diverse ACWA members. As OCWD's current First Vice President, and as its past President, it has been a tremendous experience leading OCWD in the development of innovative water programs and award-winning projects like the Groundwater Replenishment System. I am proud of what we have accomplished at OCWD, and I am even more proud that we always strive to share information – including best practices and lessons learned – to benefit the entire water industry.

So, let's continue this great work together and strengthen ACWA's voice as a leader on California water issues. I hope I can count on your support for ACWA Vice President. Please feel free to contact me at (714) 321-0522 or cgreen@ocwd.com. Thank you so much for your consideration and I look forward to connecting with you soon.

Sincerely,

Orange County Water District | 18700 Ward Street, Fountain Valley, CA 92708

Meeting ID: 893 0381 5993 Passcode: 917505

Meeting Agenda

1. CALL TO ORDER
2. APPROVAL OF MINUTES: July 27, 2021 (Attachment 1)
3. DISTRICT REPORTS:
 - a) East Bay Municipal Utility District (EBMUD)
 - b) North San Joaquin Water Conservation District (NSJWCD)
 - c) Central Delta
 - d) South Delta
 - e) RD's
 - f) Woodbridge Irrigation district (WID)
 - g) Stockton East Water District (SEWD)
 - h) Oakdale Irrigation District (OID)
 - i) South San Joaquin Irrigation District (SSJID)
 - j) Banta-Carbona
 - k) San Joaquin County & Delta Water Quality Coalition (SJCDWQC)
 - l) San Joaquin County (SJC)
 - m) Delta Caucus
 - n) CFBF
4. OLD BUSINESS:
 - a. DRAFT SGMA white board review
 - b. Delta Conveyance Project EIR (Attachment 2)
 - c. Water Management Project- CFBF policy (Attachment 3)
 - d. Emergency Curtailment & Reporting of Delta Water (Attachment 4)
5. NEW BUSINESS:
6. ANNOUNCEMENTS/OTHER BUSINESS
 - a. Hot Topics for future meetings?

Next meeting: September 28, 2021

State Water Resources Control Board

August 20, 2021

STOCKTON EAST WATER DISTRICT
ATTN SCOT A MOODY
PO BOX 5157
STOCKTON, CA 95205

INITIAL ORDER IMPOSING WATER RIGHT CURTAILMENT AND REPORTING REQUIREMENTS IN THE SACRAMENTO-SAN JOAQUIN DELTA WATERSHED

This letter and the enclosed Order contain important information regarding the curtailment status for the POST-1914 APPROPRIATIVE WATER RIGHT owned by STOCKTON EAST WATER DISTRICT, associated with Water Right ID A006522. This letter also describes a certification that is required to be submitted by **September 3, 2021**.

Enclosed with this letter is an Order imposing water diversion curtailment and reporting requirements issued pursuant to an emergency regulation adopted by the State Water Resources Control Board (State Water Board or Board) that became effective on August 19, 2021. The enclosed Order specifies the steps that you, or your agent of record, must follow to curtail water diversions when water is determined to be unavailable for this water right or claim of right and to comply with reporting requirements. You or your agent of record are responsible for immediately notifying all parties that divert water under the Water Right ID A006522 of the enclosed Order.

Please note that you will receive a similar letter and Order for each water right or claim of right in the Sacramento-San Joaquin Delta (Delta) watershed for which you are the designated mail receiver.

Emergency Regulation

In response to ongoing drought conditions and associated water supply shortages in the Delta watershed, on August 3, 2021, the State Water Board adopted an emergency regulation authorizing the curtailment of diversions when water is determined to be unavailable at a water right holder's or claimant's priority of right. (Cal. Code Regs., tit. 23, §§ 876–879.2.) The regulation was approved by the Office of Administrative Law and went into effect upon filing with the Secretary of State on August 19, 2021. The regulation will remain in effect for up to one year but could be repealed if water supply conditions improve. The State Water Board may readopt the regulation if drought conditions continue through next year. The regulation is available on the State Water Board's Delta Drought webpage at: www.waterboards.ca.gov/drought/delta/

E. JOAQUIN ESQUIVEL, CHAIR | EILEEN SOBECK, EXECUTIVE DIRECTOR

Curtailed Water Rights and Claims of Right in the Delta Watershed

The following priorities of water rights and claims of right are curtailed, meaning water diversions are required to cease under these rights and claims, **for the remainder of August 2021:**

1. All post-1914 appropriative water rights in the Delta watershed (including the Sacramento River and San Joaquin River watersheds and the Legal Delta);
2. All pre-1914 appropriative water right claims in the San Joaquin River watershed;
3. All pre-1914 appropriative water right claims in the Sacramento River watershed and in the Legal Delta with a priority date of 1883 or later; and
4. Some pre-1914 appropriative water right claims on specific tributaries to the Sacramento River with a priority date earlier than 1883.

Due to changes in available water supplies and demands following the irrigation season, the curtailments listed above change in the month of September. In the Sacramento River watershed, drainage from rice fields temporarily increases available water supplies and results in the suspension of curtailments for rights and claims on the Sacramento Valley floor in September. However, water rights and claims on some Sacramento River tributaries will remain curtailed, and some rights and claims that were not curtailed in August are curtailed in September due to limited local supplies. In the San Joaquin River watershed where no increase in available water supplies occurs in September, curtailments implemented in August will remain in effect unless water supply conditions improve (precipitation events occur) and the State Water Board changes its curtailment determinations accordingly. The following priorities of water rights and claims are curtailed **for the month of September 2021, unless the State Water Board advises that this determination has been updated:**

1. All post-1914 appropriative water rights in the San Joaquin River watershed;
2. All pre-1914 appropriative water right claims in the San Joaquin River watershed;
3. All riparian water right claims in the American River watershed upstream of Folsom Reservoir;
4. A subset of Central Valley Project and State Water Project water rights in the Sacramento River watershed and in the Legal Delta; and
5. Some pre-1914 appropriative water right claims and post-1914 appropriative rights on specific tributaries to the Sacramento River.

On a weekly basis, or more frequently if warranted due to precipitation and runoff events, updates will be provided regarding applicable curtailments, including any curtailments that may apply after September 2021 as discussed further below.

Action Required: Monitoring of Curtailment Status

Water right holders and claimants are required to monitor for changes in curtailments by signing up for email updates or frequently visiting the State Water Board's website where regular updates will be posted. **All future curtailment orders, including the suspension or reimposition of curtailment, will be issued electronically.** Hard copy notices will not be provided. Notice of new or changed curtailment orders and the

STOCKTON EAST WATER DISTRICT
WATER RIGHT ID: A006522

bases for curtailment decisions will be provided through updates to the Board's Delta Watershed Curtailment Status List (Status List) and through notices issued electronically using the Delta Drought email subscription list. The Status List will be updated at least weekly and more often if needed as hydrologic conditions evolve to reflect changes to water availability.

It is the responsibility of the water right holder, claimant, or agent of record to:

1. Determine if Water Right ID A006522 is currently curtailed by regularly checking the Status List posted on the State Water Board's Delta Drought webpage at: www.waterboards.ca.gov/drought/delta/ or
2. Subscribe to the Delta Drought email subscription list at: www.waterboards.ca.gov/resources/email_subscriptions/swrcb_subscribe.html

Response Required: Compliance Certification Form and Monthly Reporting

Water right holders, claimants, or agents of record who receive the enclosed Order are required to submit, under penalty of perjury, an online Compliance Certification Form for each water right or claim of right by **September 3, 2021**. Your online submittal will be used to assess compliance with the enclosed Order and relevant provisions of the emergency regulation, as well as inform the Board whether you plan to seek an exception to curtailment. The Compliance Certification Form must be accessed on the State Water Board's Survey Portal at: <https://public.waterboards.ca.gov/>

In addition, the regulation includes provisions for requiring enhanced reporting of water diversion information to inform future curtailment decisions. For water rights and claims with a face value or reported annual diversion amount of 5,000 acre-feet or greater in 2018 and/or 2019, the enclosed Order requires: 1) monthly reporting of water diversion and use information for prior months, and 2) monthly reporting of projected demand data. As the right holder, claimant, or agent of record, you must submit the form titled "Delta Watershed Enhanced Reporting of Actual Diversions and Projected Demand" on the Board's Survey Portal by **September 10, 2021**. A new version of this form will be made available every month and must be submitted no later than the 10th of each month.

The following credentials are needed to access the Survey Portal:

State Water Board staff will hold a webinar to explain the reporting requirements associated with the enclosed Order. Notice of this webinar will be posted on the Delta Drought webpage and sent via the Delta Drought email list.

Exceptions to Curtailment

An exception to curtailment may be authorized if: (1) the water right or claim is used only for a non-consumptive use (i.e., all water is returned to the stream) as described in section 878 of the emergency regulation; or (2) water diverted under the water right or

STOCKTON EAST WATER DISTRICT
WATER RIGHT ID: A006522

claim is the diverter's only source of water and it is needed for minimum human health and safety needs, as described in section 878.1 of the regulation.

If you wish to seek an exception to curtailment now or possibly in the future in order to continue diversions for non-consumptive uses or to meet minimum human health and safety needs, you must submit your request by **September 10, 2021**, regardless of the current curtailment status of this right. Submit your exception request(s) using the form(s) available on the Board's Survey Portal at: <https://public.waterboards.ca.gov/> (Login credentials are provided above.)

Consideration of Additional Information

You may submit additional information if you believe that: (1) a correction to the water right priority date for this water right or claim should be made; or (2) curtailment of this water right or claim is not appropriate as demonstrated by verifiable circumstances, such as the right authorizes diversion from a stream system that has been adjudicated and is disconnected, and therefore curtailment would not make water available to serve senior downstream water rights and claims (see section 876.1, subdivision (e) of the regulation). Proposals and supporting information should be submitted to the Deputy Director as specified below within **14 days of receipt of the enclosed Order**.

Water users may also propose alternative water sharing agreements that would achieve the purposes of the curtailment process pursuant to section 878.2 of the regulation. Proposed alternative agreements may be submitted to the Deputy Director at any time, but they may not be implemented instead of complying with a curtailment order unless all potentially affected water right holders and claimants concur with the proposal, or it has been approved by the Deputy Director.

Proposals and supporting information for changes to water right priorities, applicability of curtailments, and alternative water sharing agreements should be submitted to the Deputy Director at Bay-Delta@waterboards.ca.gov. The Deputy Director and Delta Watermaster as appropriate will review timely submitted information as soon as practicable and inform the affected water right holder or claimant of the determination or decision.

Potential Enforcement

The enclosed Order includes enforceable requirements regarding a water right or claim of right that require your immediate attention due to current and possible future limitations in water supplies.

A water right holder or claimant who diverts water that is not legally available, or violates the enclosed Order or the regulation, may be subject to administrative fines, a cease and desist order, or prosecution in court. The State Water Board has enforcement discretion and decisions related to enforcement and associated penalties are based on the specific circumstances of the violation. Fines may be up to \$1,000 per day of violation and up to \$2,500 for each acre-foot diverted or used in excess of a valid water right. (Wat. Code, §§ 1052, 1055, 1846.)

STOCKTON EAST WATER DISTRICT
WATER RIGHT ID: A006522

Request for Reconsideration

You may submit a petition within 30 days to request that the State Water Board reconsider the enclosed Order. The process and grounds for reconsideration are provided by California Code of Regulations, title 23, sections 768 through 771. Any petition requesting reconsideration of an order that requires enhanced reporting or curtailment must be filed with the State Water Board no later than **September 20, 2021**. To ensure timely consideration, any petition for reconsideration should be sent by email to Bay-Delta@waterboards.ca.gov.

If you have any questions, please review the Frequently Asked Questions (FAQs) on the Delta Drought webpage (www.waterboards.ca.gov/drought/delta/). You may also contact staff at Bay-Delta@waterboards.ca.gov or (916) 319-0960. Please be aware that calls and emails will be answered as soon as possible in the order received. Depending on volume, responses may take a day or longer.

Sincerely,

Erik Ekdahl, Deputy Director
State Water Resources Control Board

Enclosure: Order Imposing Water Right Curtailment and Reporting Requirements in the Sacramento-San Joaquin Delta Watershed for Water Right ID A006522

STATE OF CALIFORNIA
CALIFORNIA ENVIRONMENTAL PROTECTION AGENCY
STATE WATER RESOURCES CONTROL BOARD

DIVISION OF WATER RIGHTS

IN THE MATTER OF WATER RIGHT ID A006522 OF STOCKTON EAST WATER DISTRICT

ORDER IMPOSING WATER RIGHT CURTAILMENT AND REPORTING REQUIREMENTS IN THE SACRAMENTO-SAN JOAQUIN DELTA WATERSHED

ISSUED AUGUST 20, 2021

FINDINGS:

1. On May 10, 2021, Governor Gavin Newsom issued a Proclamation of a State of Emergency (Proclamation) for 41 counties, including those within the Sacramento-San Joaquin Delta (Delta) watershed in response to drought conditions. The Proclamation finds that it is necessary to act expeditiously to mitigate the effects of drought conditions in the Delta watershed, both to ensure the protection of health, safety, and the environment and to prepare for potential sustained drought conditions.
2. On June 15, 2021, the State Water Resources Control Board (State Water Board or Board) issued a Notice of Water Unavailability (June 15 Notice) to all post-1914 appropriative water right holders in the Delta watershed. The June 15 Notice advised that water appeared to be unavailable for diversion as of at least June 15, 2021, for all post-1914 appropriative water right holders in the Delta watershed. The June 15 Notice also warned water users with more senior water right claims that information indicated that water was expected to be unavailable this summer for some pre-1914 appropriative and riparian claimants and that the State Water Board planned to issue further notices of water unavailability. The June 15 Notice also informed water right holders and claimants that development of an emergency curtailment regulation was under consideration.
3. On July 23, 2021, the State Water Board issued a Notice of Water Unavailability (July 23 Notice) for senior water right claims in the Delta watershed, which advised diverters that, based on the best information available to the Board, water supply appeared to be insufficient to support lawful diversion under some pre-1914 appropriative water right claims and to support full diversions by some riparian claims in the Delta watershed. The July 23 Notice also notified water right holders and claimants that a draft emergency regulation was available for public review and comment.
4. On August 3, 2021, the State Water Board adopted an emergency curtailment and reporting regulation in response to ongoing drought conditions and

associated water supply shortages in the Delta watershed. (Cal. Code Regs., tit. 23, §§ 876–879.2.) State Water Board Resolution No. 2021-0028¹ adopting the emergency regulation describes the need for the regulation and its intent and is incorporated by reference into this Order. The regulation was approved by the Office of Administrative Law and became effective upon filing with the Secretary of State on August 19, 2021.

5. Section 879, subdivision (d)(1) of the regulation requires all recipients of initial curtailment or reporting orders to submit a certification regarding actions needed to comply with section 876.1.
6. Section 879, subdivision (d)(2) of the regulation authorizes the Deputy Director for the Division of Water Rights or authorized designee (Deputy Director) to require water right holders and claimants who have been issued an initial order under section 876.1 and whose water right or claim has a total authorized face value or recent annual reported diversion amount of one thousand acre-feet or more to report the following information by the date specified: (1) prior diversions, including direct diversions and diversions to storage, and (2) demand projections for subsequent months through October 1, 2022, including direct diversions and diversions to storage.

In order to refine projections of demands for use in curtailment decisions, this Order imposes enhanced reporting requirements on water right holders or claimants whose water right or claim has a total authorized face value or recent annual reported diversion amount of five thousand acre-feet or more. This information is not currently in the State Water Board's possession. These water rights and claims encompass the majority of water demand and use in the Delta watershed. Having up-to-date, refined demand data for these rights will improve curtailment decisions. With respect to the requirements imposed by this Order on water right holders and claimants in the Legal Delta, the Deputy Director has consulted with and obtained the concurrence of the Delta Watermaster, as required by the regulation. In addition, the Deputy Director and the Delta Watermaster have considered the need for the information to inform curtailment decisions and the burden of producing it.

7. Section 876.1 of the regulation establishes the process by which curtailment of water rights and claims of right in the Delta watershed may take place. When natural and abandoned flows are insufficient to support all diversions, the Deputy Director or authorized designee may issue curtailment orders to water right holders and claimants in the Delta watershed, requiring the curtailment of water diversion under designated water rights and claims in order of water right priority,

¹ Resolution 2021-0028 is available at:

www.waterboards.ca.gov/board_decisions/adopted_orders/resolutions/2021/rs2021_0028_regs.pdf

except as provided in sections 878, 878.1, and 878.2. Before issuing curtailment orders in the Legal Delta, as defined by the regulation, the Deputy Director must consult with and obtain the concurrence of the Delta Watermaster.

8. Section 876.1, subdivision (d) of the regulation specifies the information that the Deputy Director must consider in determining whether water is unavailable under a water right holder's or claimant's priority of right, and whether to order curtailment of water diversions under specific rights or claims. The regulation also authorizes the Deputy Director to evaluate water unavailability using the Water Unavailability Methodology for the Delta Watershed (Methodology), which was developed by the State Water Board for this purpose, or a comparable tool. Demand data used in the Methodology is based on annual water use reports submitted to the Division of Water Rights for 2018 and 2019 as described in the Methodology. Supply data used in the Methodology is derived from estimates of full natural flow, which were then adjusted to account for abandoned instream flows as described in the Methodology. Evaluation of available supplies against demands is performed at the Sacramento and San Joaquin River watershed scale and at the subwatershed scale.
9. This curtailment is based on consideration of the information described in section 876.1, subdivision (d) of the regulation and evaluation of available supply and demand data using the most recent version of the Methodology, documented by a summary report dated August 20, 2021.

The most recent version of the Methodology includes updates to the treatment of the San Joaquin River Exchange Contractors within the Methodology's spreadsheet in keeping with the description of their treatment within the summary report, and the removal of demand from the disconnected Goose Lake watershed, in accordance with section 876.1, subdivision (d) of the regulation. The summary report has also been updated to address certain comments received on the Methodology, including comments concerning the unique hydrology of the Legal Delta. The results of the Methodology that are used to inform these curtailments are available in both spreadsheet and graphical form on the Board's Water Unavailability Methodology for the Delta Watershed webpage at:

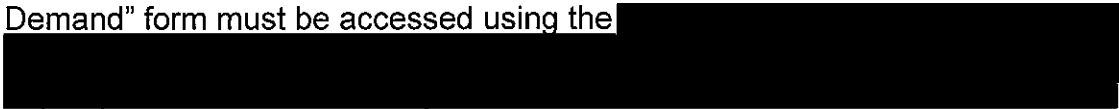

www.waterboards.ca.gov/drought/drought_tools_methods/delta_method.html

The Delta Watershed Curtailment Status List (Status List) reflects the water rights and claims for which natural and abandoned flows have been determined to be currently unavailable as a result of this evaluation.

10. In accordance with section 876.1 of the regulation, the Deputy Director has determined that natural and abandoned flows are insufficient to satisfy the needs of all diverters in the Delta watershed. The Deputy Director has determined that water is unavailable for direct diversions and diversions to storage in the Delta watershed for those water rights and claims specified on the Status List, except

to the extent that water released from storage is rediverted as authorized by a water right or contract. With respect to the curtailment orders issued to water right holders and claimants in the Legal Delta, the Deputy Director has consulted with and obtained the concurrence of the Delta Watermaster. Therefore, the Deputy Director has concluded that issuance of curtailment orders pursuant to the regulation is necessary and appropriate.

IT IS HEREBY ORDERED:

1. In accordance with section 876.1, subdivision (c) of the regulation, water right holders or agents of record who receive this Order are responsible for immediately providing notice of this Order to all diverters exercising the water right or claim covered by this Order.
2. STOCKTON EAST WATER DISTRICT or agent is required, by September 3, 2021, to submit under penalty of perjury an online Compliance Certification Form in accordance with section 879, subsection (d)(1) of the regulation. The online Compliance Certification Form must be accessed using the Login: A006522 and Password: 817857 on the Water Right Form and Survey Submittal Portal located at: <https://public.waterboards.ca.gov>
3. Effective August 20, 2021, diversion of water pursuant to water rights and claims specified as curtailed on the Status List shall cease unless the diversion is subject to an authorized exception to curtailment as described by section 878, section 878.1, or section 878.2 of the regulation.
4. STOCKTON EAST WATER DISTRICT or agent is required, by the 10th day of every month commencing in September 2021, to submit an online form titled "Delta Watershed Enhanced Reporting of Actual Diversions and Projected Demand" in accordance with section 879, subsection (d)(2) of the Regulation. The "Delta Watershed Enhanced Reporting of Actual Diversions and Projected Demand" form must be accessed using the 

5. STOCKTON EAST WATER DISTRICT shall receive all subsequent modifications to this Order, including communications that may change the curtailment status of POST-1914 APPROPRIATIVE WATER RIGHT A006522, through electronic notification via the State Water Board's Delta Drought email distribution list or as posted on the Status List on the State Water Board's Delta Drought website at: www.waterboards.ca.gov/drought/delta/
6. Pursuant to section 879.2 of the regulation, failure to comply with the regulation or this Order, including diversion or use in violation of curtailment, is subject to enforcement action, including the imposition of any applicable penalties pursuant to Water Code sections 1052, 1058.5, 1831, 1845, and 1846. To the extent of any conflict between the requirements of this Order and any other applicable

orders or conditions of approval, the diverter must comply with the requirements that are most stringent.

7. Nothing in this Order is intended to or shall be construed to limit or preclude the State Water Board from exercising its authority under any statute, regulation, ordinance, or other law, including but not limited to, the authority to bring enforcement against diverters for unauthorized diversion or use in violation of Water Code section 1052.
8. Nothing in this Order shall excuse individual water right holders and claimants from meeting any more stringent requirements that may be imposed by applicable legally binding legislation, regulations, or a water right permit requirement. This Order does not authorize any act which results in the taking of a threatened, endangered, or candidate species or any act which is now prohibited, or becomes prohibited in the future, under either the California Endangered Species Act (Fish & G. Code, §§ 2050-2097) or the federal Endangered Species Act (16 U.S.C. §§ 1531-1544). If a "take" will result from any act authorized under this Order, the diverter shall obtain authorization for an incidental take. Diverter shall be responsible for meeting all requirements of the applicable Endangered Species Act(s) for actions authorized under this Order.

STATE WATER RESOURCES CONTROL BOARD

Erik Ekdahl, Deputy Director
Division of Water Rights

Dated: August 20, 2021
